We build our benches & bleachers to the highest standards. Listed below are some of the differences by others who may be listing their benches & bleachers as comparable to ours.

1. Frames - Ours are 100% aluminum angle. Be careful of those quoting "galvanized, steel angle iron" as equal.
2. Seat Planks - Ours are 100% anodized aluminum with a minimum wall thickness of .078 in. A thinner walled unit does not have the strength or support.
3. End Caps - Ours are constructed of fiber reinforced polypropylene. No sharp edges to snag clothing or skin.

4. Indoor Use - Our Tip N' Roll units come with rubber leg protectors so they can be used indoors or out. Be careful of those units using steel vs aluminum. In a "tip-over" fashion, steel could damage your gym floor or cause personal injuries.

Don't be fooled by a low price. Our manufacturing team has been in this business for 30 years. If you see bids or quotes that "seem too good to be true" - they are. Respectable manufacturers purchase aluminum at the same prices. Anyone offering to deliver product at 30% less is not matching specs.

## EXCLUSIVE AIR RELEASE™ SYSTEM

Adjustable and removable waterproof clavic channel pads provide a custom fit for individual player comfort and maximum safety. Patent #5,701,611

Layered foam cushions impact by quickly forcing air through vents in the pad sidewall. Each pad quickly rebounds to be ready for the next impact.

## Z-COOL® MOISTURE TRANSFER SYSTEM

Patented High Impact Inner Poly Arch design featuring vent holes front and back is sandwiched between two layers of 3-D Air Flow Brock® Foam and supported by an outside Poly Plate. Patent #7,168,104

## HOW Z-COOL® WORKS

### 1. ACTIVE AIR CIRCULATION:

3-D Air Flow Brock® Foam allows air to circulate through the pad in three dimensions. As sweat coats the surface area of the waterproof foam beads, the airflow actively accelerates evaporation which is the key to body temperature cooling and post-game drying time.

### 2. IMPACT ENERGY DISPERSION:

Z-Cool® shoulder pads feature Brock® Foam giving them an advantage over the standard open cell foam. Upon impact, each bead in the Brock Foam padding dissipates and redistributes energy waves to the connected adjacent beads.

### 3. ENHANCED PERFORMANCE:

The benefits of Z-Cool® technology provide athletes with an extra edge on the competition. A perfect combination of materials and engineering to cool the athlete's body by wicking away perspiration and protecting athletes with superior impact dispersion. An ultra-light design that allows athletes at all levels to perform at their very best... in the very best.

## ZC SKILL

- Flat pad design for low profile with all of the features needed to provide protection and improved mobility required for all skill positions
- Extended flexible arches for superior speed and mobility that are rigid and durable enough to handle the big hits
- Lightweight design with extended arch protection features fixed cap pads, making this a good choice for read option quarterbacks, wide receivers and defensive backs.

# POST GAME REACTION

*“Our players love the fit and feel of our Gear shoulder pads. We have used them since our football program’s inception in 2009. Our absence of shoulder and upper-body injuries, combined with competitive pricing and unrivaled customer support shows that you can’t go wrong with Gear products.”*

**Adam Howard - Head Football Coach, Notre Dame College of Ohio**

*“I’ve found that Gear shoulder pads have provided our program with great protection for our athletes. We have used the Gear pad for the last 10+ years and their durability is the best by far. Many other pads have failed during reconditioning within 5 years of being purchased. Gear pads stay in great shape...even after 10 years of use!”*

**John Livengood - Head Football Coach – Norwalk St. Paul High School**

*“The Z-Cool pads provide great protection for our players, and the fact that they are lightweight helps our players’ performance on the field. The Z-Cool Pads are also very “clean” pads. They dry quickly and don’t hold moisture.”*

**Greg Stubbs - Head Football Coach - Tennessee High School**

*“I have been buying Z-Cool shoulder pads for the past five years. Here at Boise State, our players love the protection, light weight and added mobility the Z-Cool shoulder pads provide.”*

**Dale Holste - Head Equipment Manager, Boise State University**

*“Gear Shoulder Pads have made a huge impact in my program. I have much fewer injuries and far less complaints when my players are wearing these pads. Gear Pads have become the overwhelming favorite among my players.”*

**Mike Kohl - Head Football Coach, Bradley Bourbonnais High School**

*“This year we purchased the Gear shoulder pads. After taking time to research the pads I found them true to what they promote. As an athletic trainer I am first trying to protect our athletes from injuries in football. I truly like the way the shoulder pad fits, especially with the adjustable padding at the AC joint, allowing me to custom fit each player based on their shoulder girth. The moisture management system with the material built into the pads has helped the athletes stay cool along with helping prevent issues related to moisture left in the shoulder pads. This has drastically cut down problems with Staph and other bacterial germ diseases. Our quarterback loves the fit and mobility he has with the Gear Z-Cool QB pads. I like the quality protection these pads provide and will continue to look at Gear pads for future football seasons.”*

**Kris Knapp - Head Trainer/Equipment Manager - Ontario High School**

## FUN FOR ALL AGES AND SKILL LEVELS

**FUNNETS™** are made of a unique blend of materials designed specifically for outdoor use. Our heavy body construction is UV treated and is unbreakable. We know you have seen the imitation PVC plastic goals which are made of tubing designed for plumbing applications. These imitation goals have a very low impact resistance which can cause the piping to break and expose sharp edges.

Our **5 Year Unlimited Warranty** is the best in the industry.

**DON'T BE FOOLED BY CHEAP IMITATIONS!**

### SPORTSTUFF® ROD

Our engineers searched for the perfect blend of flex/strength ratio. The result was the Sportstuff® rod. A safe, unbreakable rod with UV stabilizers, that lasts a lifetime!

**FUNNETS® FITTINGS**  
The Funnet® fitting is molded out of ABS plastic with UV stabilizer for long life and strength. The fittings are longer for a more secure fit. Each fitting has set screws which allow the fitting to be tightened securely to the rod.

**EASY TO CARRY AND TRANSPORT**
